

KARTHICK SRINIVASAN

SDET | QA Automation Engineer | Selenium | Playwright

karthicksri2001@gmail.com | +91 9488733282 | Chennai, India | [linkedin.com/in/karthick-srinivasan-068b011a1](https://www.linkedin.com/in/karthick-srinivasan-068b011a1)

PROFESSIONAL SUMMARY

QA Automation Engineer and SDET with 3+ years of experience in functional testing, regression testing, and end-to-end test automation across web and desktop applications. Proficient in Selenium WebDriver (Java), TestNG, Cucumber (BDD), Playwright and CI/CD integration using Jenkins. Built and maintained 200+ automated test cases, reducing regression cycle time by 60%. Experienced in API testing (Swagger/REST), performance testing (JMeter), defect lifecycle management (Jira), and Agile/Scrum SDLC. Certified in Microsoft Azure (AZ-900), Google Cloud, and GitHub Copilot. Currently expanding skills in mobile application testing and cross-platform QA.

PROFESSIONAL EXPERIENCE

Quality Engineering Analyst | Accenture

Aug 2024 – Present • Chennai

- **Spearheaded QA automation** initiatives across web and desktop application, achieving 95%+ test coverage across functional and regression test suites.
- Designed and executed **250+ automated test cases** using Selenium WebDriver, TestNG, and Cucumber (BDD), reducing manual regression effort by 60% (from 3 days to ~5 hours per sprint).
- Integrated test scripts into **Jenkins CI/CD pipelines**, enabling continuous testing on every build and reducing release cycle defect leakage by 30%.
- Performed **REST API testing** using Swagger for 15+ endpoints, validating request/response payloads and edge-case scenarios.
- Actively participated in **Agile ceremonies** (sprint planning, daily standups, retrospectives), consistently aligning QA deliverables with sprint goals.

Associate Consultant – QA | Atos Syntel

Sep 2022 – Jul 2024 • Chennai

- Built and maintained modular **Page Object Model (POM)** automation framework from scratch, improving test reusability by 40% and reducing script maintenance time by 35%.
- Authored **200+ comprehensive test scenarios** and test cases aligned with business requirements and STLC processes, covering smoke, sanity, regression, and end-to-end testing.
- Designed and executed performance and load test scenarios using JMeter for 5 critical modules, uncovering 3 key bottlenecks and enabling performance optimizations that reduced average response time by 28%.
- Managed test environments and test data setups across **3 environments** (dev, staging, UAT), ensuring zero-conflict execution cycles.
- Maintained version control using **Git**, managed branching strategies, and collaborated with 8-member development and product teams in Agile Scrum settings.
- Performed **database validation** and SQL querying to verify data integrity across back-end systems.

TECHNICAL SKILLS

Programming: Core Java, OOP Concepts, SQL (Database Validation & Querying)

Automation Tools: Selenium WebDriver (Java), TestNG, Cucumber (BDD), Page Object Model (POM), Playwright, JavaScript.

API & Performance: Swagger (REST API Testing), JMeter (Performance & Load Testing), Postman

CI/CD & DevOps: Jenkins, GitHub Actions, Docker, Git (Version Control)

Test Management: Jira, TCMC, Agile Scrum, STLC, Defect Lifecycle Management

Testing Types: Functional, Regression, Smoke, Sanity, End-to-End, Cross-browser, API, Performance

Cloud Platforms: Microsoft Azure, Google Cloud Platform

CERTIFICATIONS

- Microsoft Azure Fundamentals – AZ-900
- Microsoft Data Fundamentals – DP-900

- Microsoft GitHub Copilot – GH-300
- Google Cloud Digital Leader
- Google Generative AI Leader

EDUCATION

B.E., Computer Science and Engineering

2018 – 2022

Prince Dr. K. Vasudevan College of Engineering and Technology, Chennai | CGPA: 8.4
